## **Renewable Energy**

Moving beyond fossil fuel to a post-carbon world by developing renewable, low-impact, highly-localized energy sources

## **Sustainable Technology**

Moving beyond technology that requires extraction, depletion, and pollution; rewarding innovation, not consumption

## **Organic & Resilient Agroecology**

Moving beyond conventional agriculture, now dominated by monoculture grains, by expanding the repertoire of food crops

## **Territorially Integrated Operational Networks**

Moving beyond age-worn notions of sovereignty to create integrated networks for managing ecoregions with networks based on ecological realities.
